383-385

TEUCO COMBI UNITS, EVERYONE'S WALK-IN BATH WITH SHOWER SOLUTION.

The beauty of Teuco 383 and 383 combi units is their comprehensive range of uses.

Indeed, they were designed to provide for the needs of the entire family, from children, to adults and even the elderly. Everyone can enjoy them as either a bathtub or a shower as they are easy, safe and comfortable to use.

Available in several sizes and in plenty of different configurations to accommodate all spaces and individual requirements, they ensure maximum comfort thanks to attentive ergonomic design.

Without compromising on aesthetic appeal, they fit in perfectly with any bathroom décor, thanks to the customisable panelling.

383-385

DETAILS THAT MAKE THE DIFFERENCE.

The 383 and 385 combi units are more comfortable than conventional walk-in baths with showers. The full-height door grants access to a comfortable shower space which affords the utmost freedom of movement.

The comfortable and ergonomic bathtub can be fitted with Hydrosilence, Teuco's exclusive super-silent whirlpool. The 383 and 385 combi units are thus genuine regenerating oases of relaxation to enjoy at any time without worrying about disturbing your neighbours.

At last an uncompromising product.

SEATS.

383 and 385 can also be used whilst seated, making them even more practical and safe. In the 383 model, the seat is built in, whereas in the 385 model it is removable. Safe use is further guaranteed by the wall-mounted hand-rail.

EASIER ACCESS THROUGH THE WIDE DOOR.

Getting into the 383 and 385 combi units is easy and safe, thanks to the full-height door which makes it easier to get into the bath without having to climb over the side. The step is just 13 cm high.

LONG-LEVER ACCESS HANDLE: MINIMUM EFFORT, MAXIMUM SAFETY.

To grant easy access to everyone, the door opens inwards with a long-lever handle that requires minimum effort. Ensuring total safety: to prevent the door from being opened accidentally, the handle comes with a mechanical latch that can be opened from both the inside and the outside. Guaranteed against water leaks, thanks to the seal around the entire access perimeter.

EASY TO USE.

Practical from any point of view as its ergonomic design makes it easy to use for the person inside and an assistant outside, where present.

COVERABLE PANELS: CREATE YOUR OWN SETTING.

Being able to choose the panel covering means the model will always blend in seamlessly with any bathroom décor. As an alternative to the acrylic panels, you can choose from natural or synthetic wood panels in three different finishes.

Teuco combi units were designed to offer maximum comfort and ergonomics together with a luxury look thanks to its attractive design by Lenci and the painstaking care for details and finishes.

And for the more particular tastes, you can opt for the customisable coverable panels, to ensure your bathtub matches the rest of your bathroom.
