

ARMANI / Roca

ARMANI / **Roca**

“When it came to creating this exclusive space with Roca, I imagined a completely innovative concept which would combine practicality and pleasure in a completely effortless and natural way.

A beautiful and harmonious space which would elegantly and subtly combine all the functional aspects of a bathroom, whilst at the same time providing an area of comfort and well-being.

A warm and contemporary atmosphere perfectly combining technology with elegant and sophisticated luxury allowing you to relax and unwind.”

A handwritten signature in white ink, reading "Giorgio Armani". The signature is fluid and cursive, with a long, sweeping tail on the final letter.

THE CONCEPT

The Armani/Roca bathroom concept is the expression of elegant simplicity and total harmony, both quintessential of Giorgio Armani's unmistakable style, captured in the bathroom space. An integral interior design concept which transforms the bathroom into a space dedicated to the pleasure of the senses.

The Armani/Roca space encompasses everything from wall and floor coverings, to the illuminated ceiling and includes the sanitary products, accessories and all your bathroom necessities. All these elements combine to project Giorgio Armani's style and ethos for the home into the bathroom area.

As such, the bathroom is converted into a sole entity where fine materials and exclusive finishes, together with technologically advanced solutions, allow the integration of all the essential elements of the bathroom space in one style without compromising the harmony of this atmosphere of emotions and sophistication.

As if it were a work of art or an item of haute couture, the entire collection oozes perfection and expertise not only in the treatment and choice of materials and colors, but also right down to the very last detail.

For the first time the bathroom is in the form of an island where all the elements are included and divided into 4 areas: the wellness bathroom area, the beauty area, the wellness shower area and the basic needs area.

The areas of beauty, wellness and basic needs have been separated to preserve the intimacy of each, yet at the same time the sense of openness is not lost. These different areas are separated by means of a sophisticated system of glass partitions with or without an opacity mechanism which allows those who prefer greater privacy to control the degree of intimacy in the different areas.

Minimalist yet functional faucets lend this area of the bathroom the necessary comfort without jeopardizing the simple aesthetics which characterizes this collection.

The elegant bathtub is filled from one side with a waterfall effect coming from an innovative aperture running around the rim of the bathtub. A similar system, designed exclusively for Armani and never seen before in the bathroom world, controls the overflow.

The shower area provides the perfect escape and relaxation needed thanks to its ceiling shower with rain effect, wall spout with waterfall effect and wall mounted jets which provide a targeted massage.

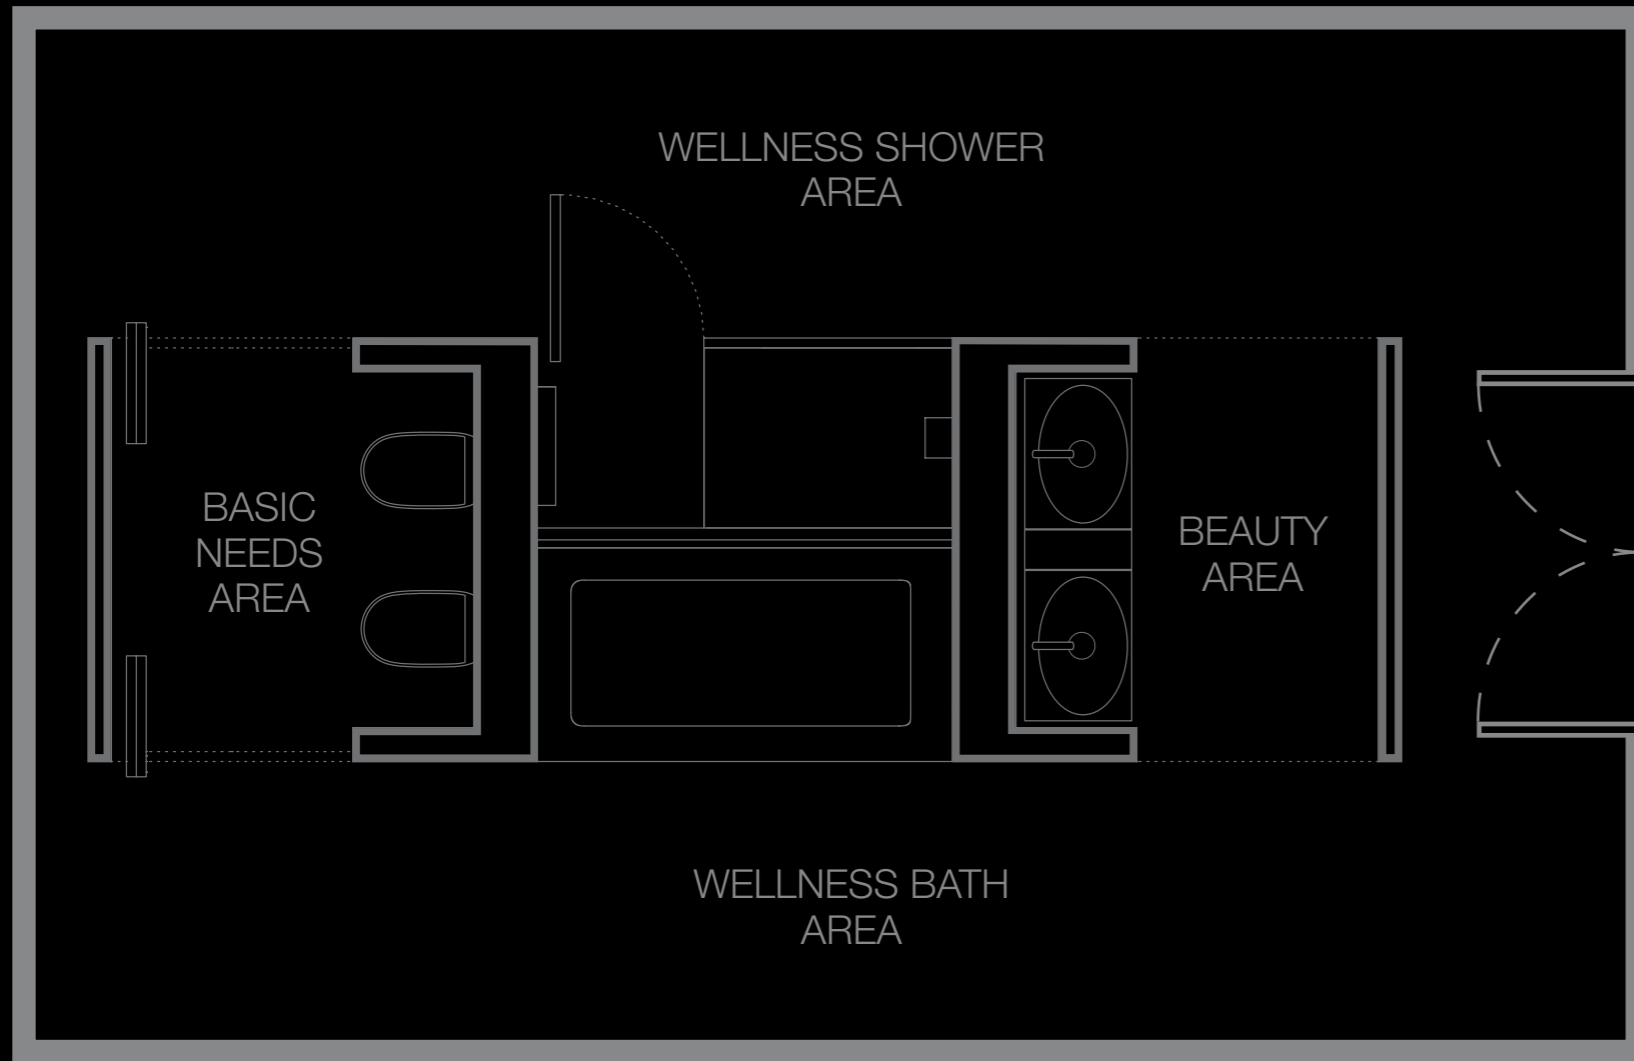

The soft, discreet lighting is incorporated directly into the false ceiling and its intensity can be regulated through an optional domotic control to create different lighting moods and chromo therapy in the bath and shower area.

An intimate environment of warmth and elegance is created through carefully selected color and material combinations which are evident in every last detail.

The Armani/Roca bathroom concept is an island of sophistication with a revolutionary approach which offers a full range of practical solutions commensurate with the most contemporary and cosmopolitan home.

THE AREAS

This new interior design concept created by Armani/Roca is an island made up of four distinct areas; the Beauty Area, the Wellness Bath Area, the Wellness Shower Area and the Basic Needs Area. These four independent areas are in fact connected, allowing the user to vary the degree of privacy as desired.

BEAUTY AREA

The contemporary shallow porcelain washbasins integrate perfectly in the collection and also feature the *Water-Flow* effect; perfectly designed to allow the water to flow smoothly without leaving water marks. The discreet automatic water outlet and overflow have *Hide-flow* technology eliminating unnecessary visual elements.

The matching faucets with the control on the edge of the washbasin are in perfect harmony with the rest of the elements in this practical area. With an elegant metallic finish they are also fitted with *Smart-Flow* technology which saves both energy and water.

The simple, straight lines of the furniture afford this space an elegant and practical ambiance. Extensive storage space is amplified thanks to a siphon space-saving system.

The *Self & Soft Close* mechanism in the draws ensures a completely smooth opening and a soft closing. The drawers can be easily personalized with the multifunctional trays of the *Up-to-you* system.

Every last detail has been taken care of and the mirror is no exception. With lateral illumination and atmospheric lighting at the top and base, the mirror also boasts an electric system which prevents steaming up caused by condensation in the bathroom.

An Armani/Roca bathroom is a space in which all elements have been carefully thought through to be in harmony with each other, including even the smallest accessories. For example, square containers with covers, towel rails and robe hooks. In addition to this there is a built in vertical cabinet with an adjustable magnifying mirror, hidden electrical outlets, a shelf and courtesy lighting.

WELLNESS BATH AREA

This area is especially designed to invigorate. Here you can unwind and relax.

The comfortable and spacious bathtub, complete with the *soft* headrest, is filled through the innovative aperture on the inside perimeter cascading water in on one side. This ingenious *Hide-flow* system also acts as an overflow.

As an optional extra enjoy a bath with *Champagne Bubbles*, bubbles the size and texture of those in champagne, and *Water Chromo Therapy*, both of which are controlled by touch sensitive buttons on the edge of the bath.

Optional atmospheric lighting installed in the ceiling over the bath and shower areas using LED chromo therapy technology allows you to experience different states of relaxation programs; calming, stimulating, balanced and complete.

A towel rail with optional hooks is the perfect accessory for this area.

WELLNESS SHOWER AREA

In an Armani/Roca shower, the daily act of showering is transformed into a sensual experience. Take a gentle rain shower, re-created with a broad shower head placed in the ceiling, or submerge yourself under a waterfall thanks to a cascade spout positioned on the shower wall.

Maintaining the simple lines of the collection the fireclay shower tray, with hidden water outlet, is integrated at floor level thanks to *Zero-to-surface* technology.

The discreet built-in swivel-headed jets, for full body massage, ensure that this is the ultimate relaxation and wellness area.

The shower's thermostatic mixer controls the 5 water sources; rain shower head, handheld telephone, waterfall and two jets. All jets and nozzles are all fitted with the silicone anti-limescale system *Easy Clean* to ensure optimum functionality and easy maintenance.

A vertical built-in cabinet complements this area alongside a towel rail and a shelf with a versatile system of containers and hangers which can be completely personalized for individual uses.

BASIC NEEDS AREA

The Basic needs area has been created with an exquisite subtlety. Suspended from the wall by hidden brackets, both the lavatory and bidet have *Soft Close* covers with hidden hinges.

The lavatory incorporates *Touch-Flush* technology which is built into the back wall and has dual flush with touch sensitive control. This sanitary ware element is a one piece design to make cleaning easier and guarantee optimum hygiene.

The bidet's single mixer faucet is fitted with *Smart-flow* technology which simultaneously saves water and energy. The *Hide-tap* design means the faucet is not visible when the cover is closed.

The *Toilet-Jet*, a hand held extendable mini shower, is discreetly built into a cabinet and hidden by the *Hide-shower* design. It guarantees complete cleaning of the lavatory bowl.

The essential accessories in this area have been created in the unmistakable style of Armani; built-in cabinets make everything easily available without deviating from the overall aesthetics of the bathroom.

COMMON ELEMENTS

Porcelain tiling and flooring

Thanks to its porcelain wall and floor tiles, the Armani/Roca bathroom concept achieves an utterly flawless look. Roca's exclusive Rock & Rock technology ensures high performance from its incredibly textured tiles. Specially designed pieces complete this range allowing you to achieve perfect positioning for an impeccable finish.

Dividers

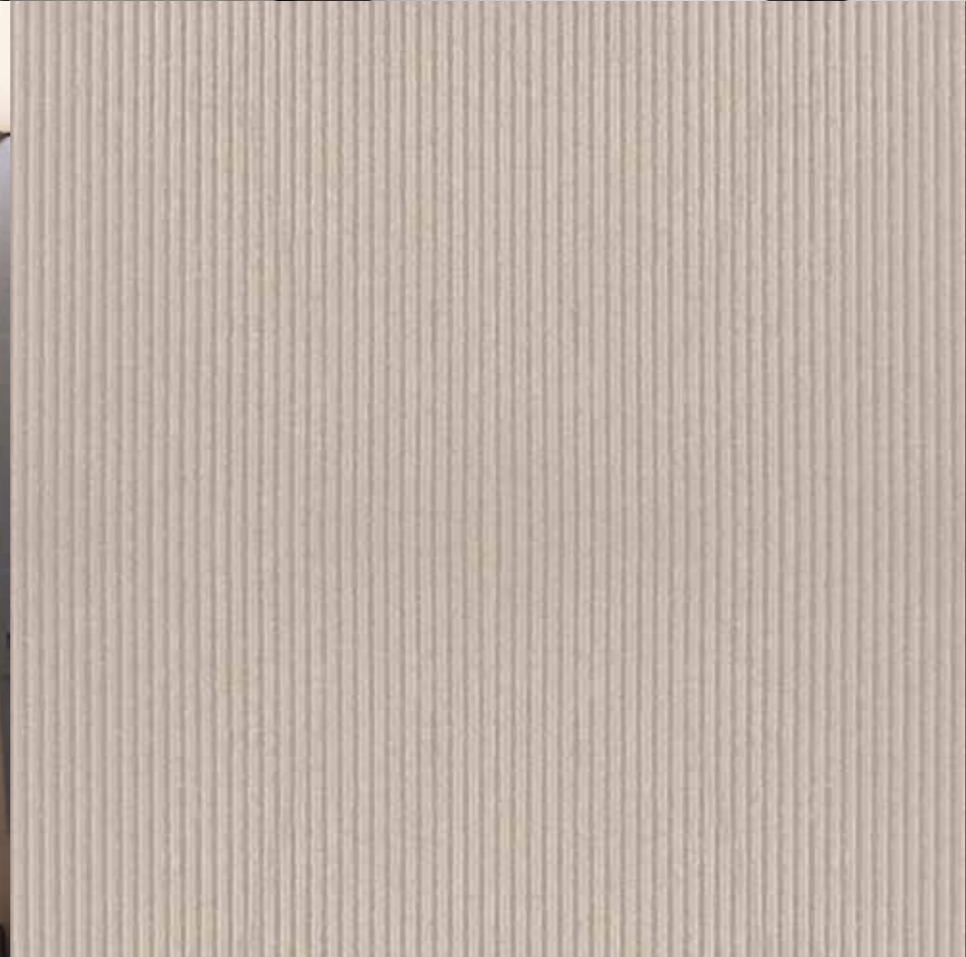

The tailor-made dividers come with an optional feature which allows opacity control for increased privacy. The bi-coloured mesh encased in the double layer of safety glass, finished with an aluminum border, lends an elegant and at the same time innovative appearance.

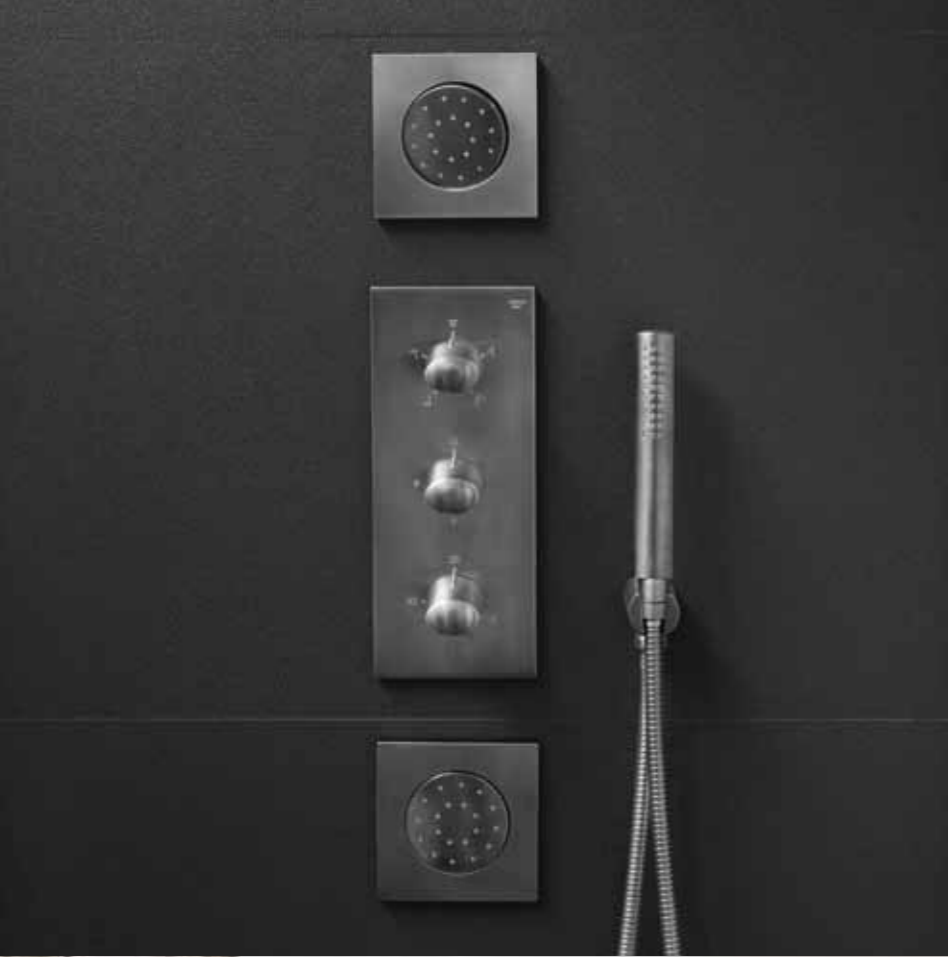

Lighting

The soft and atmospheric lighting incorporated within the false ceiling can be adjusted by a domotic switch to create different lighting moods and has the option of chromo therapy along with the bath and shower area.

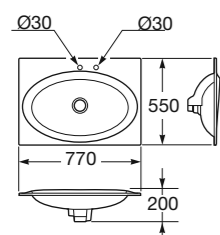

Finishes

Excellent finishes and surprising combinations of texture and recommended colors are the key to providing this imaginative bathroom space with the impeccable elegance and discreet luxury inherent in the Armani style.
